

The IEA 10 points

1. Do not sign any new gas supply contracts with Russia. [**Impact:** Enables greater diversification of supply this year and beyond]
2. Replace Russian supplies with gas from alternative sources [**Impact:** Increases non-Russian gas supply by around 30 billion cubic metres within a year]
3. Introduce minimum gas storage obligations [**Impact:** Enhances resilience of the gas system by next winter]
4. Accelerate the deployment of new wind and solar projects [**Impact:** Reduces gas use by 6 billion cubic metres within a year]
5. Maximise power generation from bioenergy and nuclear [**Impact:** Reduces gas use by 13 billion cubic metres within a year]
6. Enact short-term tax measures on windfall profits to shelter vulnerable electricity consumers from high prices [**Impact:** Cuts energy bills even when gas prices remain high]
7. Speed up the replacement of gas boilers with heat pumps [**Impact:** Reduces gas use by an additional 2 billion cubic metres within a year]
8. Accelerate energy efficiency improvements in buildings and industry [**Impact:** Reduces gas use by close to 2 billion cubic metres within a year]
9. Encourage a temporary thermostat reduction of 1 °C by consumers [**Impact:** Reduces gas use by some 10 billion cubic metres within a year]
10. Step up efforts to diversify and decarbonise sources of power system flexibility [**Impact:** Loosens the strong links between gas supply and Europe's electricity security]
